

The following chemicals should be added to the wading pool on each weekday. This is an attempt to incrementally maintain the required levels without getting too far out of balance. If you miss a day, make it up on the next or wait until the weekend. Reload the the chemical containers on the weekend and make other manual adjustments as required.

**Sodium Bicarbonate**  
**i.e. baking soda**  
(Leslie's Alkalinity Up)  
  
(raises Total Alkalinity)
